

Behrooz Abiri - CTO of GuRu Wireless, Inc.

A hardware hobbyist and International Physics Olympiad gold medalist - Behrooz has always been an avid inventor. He's spent his life studying, learning, and exploring emerging technologies. His work at GuRu stems from a wish to share miraculous technology with the world at large.

At GuRu, Behrooz is responsible for the ongoing development of core technology and system architecture. Under his leadership, GuRu's millimeter-wave technology has been developed into an accessible consumer product. Before GuRu, Behrooz helped develop system design and architecture in Caltech's Space Solar Power Initiative. He holds a Ph.D. in Electrical Engineering from Caltech.
